Various on-site electrical switchgear buildings were designed to enhance the Owner's capabilities for reliable emergency power to keep this critical facility operational at all times. A simple screen wall helps the equipment to blend with existing structures. TDM has accomplished dozens of high-tech remodeling projects on this campus. Phased over several years, new technologies in construction were incorporated to minimize the impact of new construction on a very sensitive site.

Client:
The Aerospace Corporation

Location:
El Segundo, CA

Size:
Various, average footprint 1500 square feet each plus interior modifications to existing facilities.

Cost:
Withheld at Owners request.
